The scientific article is devoted to the questions of developing the relevance of a human potential in modernization of an economic society system. The role of human fund in the system of new economic relations of an innovational industry is studied by the author. The influence of institutional changes to developing of economic relations is investigated in the article. The level of health, qualification, skills of using knowledge, competence nowadays is considered to be the main parts that make new economic relations of innovational industry. Based on the data of the concepts of long-term social-economic development of the Russian Federation from this time till 2020, may come to conclusion that Russia drops behind from other countries with the level of economic development though it has high educational potential. It can be explained with ineffective using of human fund and irrational investment into it. Having investigated, the authors classify into several groups: scientific center ↔ entity customer ↔ state. The main advantage of the innovational system is communicative skills and possibilities of organization. The practical importance consists in possibility of application of the theoretical provisions and practical recommendations stated in the research by bodies of legislative and executive power during the developing and implementation of federal and regional programs of support of the production and educational sphere by them in the conditions of modernization of system of the economic relations. The conclusions received in the course of research can form a methodological basis of creation of comprehensive programs of support of the production and educational sphere by means of efficiency of use of the available intellectual capital.
